Using and caring for your new handcrafted art-glass nail file.

- Suitable for both natural *and* artificial nails (*a damp file works best on artificial nails*).
- Filing surface is permanently etched into tempered glass. It won't wear out or break down.
- Yes, you can fly with it in your carry-on luggage!
- Clean by washing under a faucet, or sterilize with heat, liquid, or UVB light.
- Regular use reduces nail chipping, peeling and splitting for many users.
- Large file for feet works wonders on cracked heels and calluses. Recommended for diabetes-related foot care because it does not break the skin like metal implements!
- File is made of tempered glass from the Czech Republic–even if dropped on a tile floor it might break, but it will not shatter! (*File is not guaranteed against breakage.*)
