

## *Using and caring for your new art-glass nail file.*

Your new art-glass nail file is as functional as it is beautiful. Each file is made of tempered glass from the Czech Republic and embellished with original, handcrafted dichroic art glass, individually created by women glass artists from the Pacific Northwest. With reasonable care, it will last a lifetime.

Suitable for both natural *and* artificial nails (*a damp file works best on artificial nails*).

Filing surface is permanently etched into tempered glass, so it won't wear out or break down.

Yes, you can fly with it in your carry-on luggage!

Clean by washing under a faucet, or sterilize with heat, liquid or UVB light.

Regular use reduces nail chipping, peeling and splitting.

Large file for feet works wonders on cracked heels and calluses. Recommended for diabetes-related foot care because it does not break the skin like metal implements!

File is made of tempered glass from the Czech Republic—even if dropped on a tile floor it may break, but it will not shatter!

*(File is not guaranteed against breakage.)*
